

About Us

Our Little Joey's Transition Program is designed to allow students a smooth transition into Primary Schooling. The children will be exposed to a diverse curriculum that caters for all needs and recognizes individual differences. Joey's are partnered with year 5 buddies who assist with orientation and support the child. Feel free to visit the school facilities and talk to us about what St. Joseph's has to offer.

All students are entitled to an excellent education and genuine opportunity to succeed.

At St Joseph's Primary School, programs and initiatives have been developed that create and maintain positive and productive partnerships between teachers, staff, students, parents and the wider community.

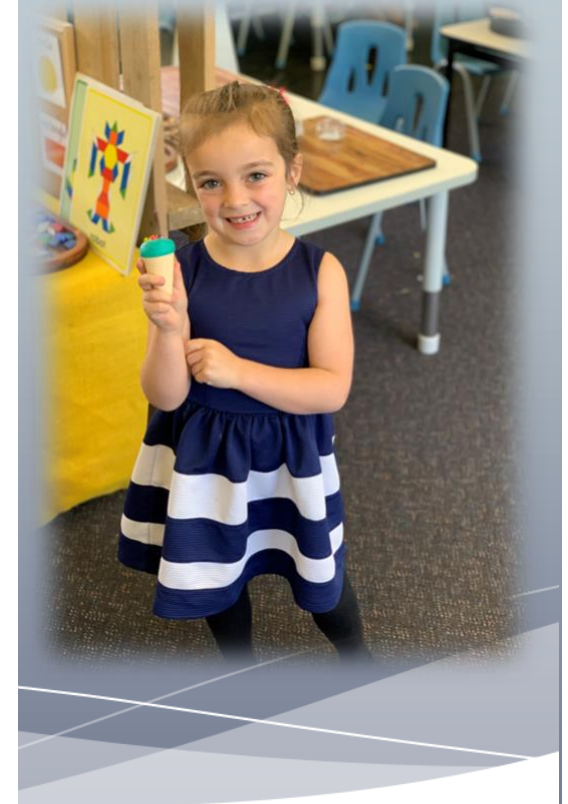

Good discipline grows out of respect. To deal effectively with students, we must form relationships that are non-judgmental and nurturing, enlisting their assistance in subtle ways that help the student experience success.

Students need and must experience positive interaction with adults each day. Role modelling is a major part of the educator's behaviour at St Joseph's Primary School. How we behave sets the benchmark for everyone in the Rochester Community.

Schools and teachers can make a difference - consistent, high quality teaching improves student learning

St Joseph's Little Joey's Transition Program

2020 Program

Our Little Joey's transition program operates every Wednesday morning from 9-11am. A qualified teachers and learning support officer work with students in a simulated classroom setting. All families are welcome to attend this program.

Choosing the right school...

Being a parent involves making many important decisions regarding your child's future education.

One of these decisions will be about which school to send your child in 2019. Some parents will make this decision with little hesitation while others will agonise and worry as to whether they have made the right choice. It is an important decision and one which you must feel comfortable with.

At St Joseph's we have developed a transition program designed to inspire and motivate. Our program prepares your child for their new learning environment, and helps us as teachers to gain a greater knowledge of your child. Your child will experience and enjoy a special, relaxed and stimulating time at school. This is the beginning of the all-important home-school partnership.
